# Microsoft

**74-353 PRACTICE EXAM**

**Windows UX Design**

---

**Question: 1**

---

What is the meaning of the phrase 'Design for touch first'?

- A. Support for mouse and keyboard interaction is optional.
- B. Prioritize touch interaction over mouse and keyboard interaction.
- C. Ensure that users can directly manipulate content by using touch.
- D. Always allow users to switch between touch mode and mouse-and-keyboard modes.

---

**Answer: C**

---

---

**Question: 2**

---

You are designing a shopping cart for an e-commerce application. Users will commit to purchase transactions by clicking a Confirm button. What is the recommended minimum target width for this high-consequence action button?

- A. 5 mm
- B. 7 mm
- C. 9 mm
- D. 12 mm

---

**Answer: C**

---

---

**Question: 3**

---

When designing interactions for Windows 8 applications, which posture is most important to design for?

- A. Two hands holding the device, thumbs interacting with the device,
- B. Device resting on table or lap, two hands interacting with the device.
- C. One hand holding, one hand interacting with the device.
- D. Whatever posture is relevant to application user scenarios.

---

**Answer: D**

---

---

**Question: 4**

---

When should you use a Cross fade animation?

- A. When some of the information on the page is changing.
- B. When semantic zoom is invoked.
- C. When users launch the application.
- D. when users start their Windows 8 devices.

---

**Answer: A**

---

---

**Question: 5**

---

You are designing a Windows 8 application. You need to include animation. What should you do?

- A. Choose a free animation from the Windows 8 Animation Library.
- B. Purchase an animation from the Windows 8 Animation Library.
- C. Choose a free animation from the Windows 8 Animation Library, or create your own animation.
- D. Create your own animation.

---

**Answer: D**

---

---

**Question: 6**

---

Which monetizing method usually generates the least revenue for applications that don't have a strong pre-existing brand?

- A. in-application purchase
- B. third-party transaction
- C. advertising
- D. one-time purchase

---

**Answer: D**

---

---

**Question: 7**

---

Which statement about application names is true?

- A. An application name must be unique throughout the store.
- B. An application name must be unique within its category.
- C. An application name must be unique within its market.
- D. An application can have the same name as any other application in the store.

---

**Answer: C**

---

---

**Question: 8**

---

An advertiser is willing to pay a \$2 CPM. What does CPM refer to in this context?

- A. cost per 1,000 impressions
- B. cost per 1,000,000 impressions
- C. cost per impression
- D. cost per month

---

**Answer: A**

---

---

**Question: 9**

---

Which attribute makes the Windows Store a good place for users to discover new applications?

- A. availability from the Start screen

- B. advertising support
- C. flexible business model
- D. transparent terms and onboarding process

---

**Answer: A**

---

---

**Question: 10**

---

Which entry point is required in the Settings pane for network-capable applications?

- A. User Login
- B. Connection Status
- C. Privacy Statement
- D. Feedback

---

**Answer: C**

---

---

**Question: 11**

---

What should an application do if a user activates the Share charm when nothing on the page can be shared?

- A. Disable the Share charm.
- B. Display a default message in the share pane.
- C. Display a message dialog indicating that sharing is not possible.
- D. Display and immediately dismiss the share pane.

---

**Answer: B**

---

---

**Question: 12**

---

You are designing a file picker page for an application. The top and bottom areas of the page are controlled by Windows. You need to place a Refresh command on the page. Where should you place the command?

- A. At the bottom of the file picker content area (above the area controlled by Windows).
- B. On the file picker page app bar.
- C. On a flyout menu.
- D. At the top of the file picker content area (below the area controlled by Windows).

---

**Answer: D**

---

---

**Question: 13**

---

What is the recommended location from which to access user account management?

- A. nav bar (top app bar)
- B. Settings charm
- C. context menu
- D. app bar

---

**Answer: B**

---

---

**Question: 14**

---

Which two requirements should a file picker view design meet? (Each correct answer presents a complete solution. Choose two.)

- A. Be consistent with the list/browsing pages of the application.
- B. Provide only the minimum functionality required to support file picking.
- C. Provide access to all file-related commands available in the application,
- D. Be different from the list/browsing pages of the application.

---

**Answer: BD**

---

---

**Question: 15**

---

What should you do to improve the search experience for users?

- A. Display the search results page only when search results are found.
- B. Never filter search results into categories.
- C. Minimize search result details to simplify scanning.
- D. Block searching when users enter a misspelled search term.

---

**Answer: C**

---

---

**Question: 16**

---

What is the purpose of contracts in Windows 8?

- A. To allow applications to extend or customize Windows features.
- B. To allow applications to update Start screen tiles.
- C. To allow applications to work together on broad scenarios.
- D. To support background tasks.

---

**Answer: C**

---

---

**Question: 17**

---

Which of the following statements about labeling commands that are visible in snapped view is true?

- A. You should provide a label of eight or less characters.
- B. You should label a command only if its icon does not clearly identify it.
- C. You should not label commands in snapped view.
- D. You should provide a label of whatever length is necessary for clarity.

---

**Answer: C**

---

---

**Question: 18**

---

Which of the following statements about designing for Portrait mode is true?

- A. Layout and interaction in Portrait mode should be consistent with the snapped view.
- B. Applications that scroll horizontally in Landscape mode should scroll vertically in Portrait mode.
- C. Layout and interaction in Portrait mode should be consistent with Landscape mode.
- D. All applications must support Portrait mode.

---

**Answer: C**

---

---

**Question: 19**

---

What is the recommended screen size for which you should design applications?

- A. 1024x768
- B. 1280x800
- C. 1366x768
- D. 1920x1080

---

**Answer: C**

---

---

**Question: 20**

---

Which three DPI scaling percentages does Windows 8 support?

- A. 80%, 100%, and 140%
- B. 100%, 140%, and 180%
- C. 100%, 150%, and 200%
- D. 100%, 200%, and 300%

---

**Answer: B**

---

---

**Question: 21**

---

You are designing an application for a chess game. What should you do to adapt the application for larger screen sizes?

- A. Display more user interface controls on the page canvas as the screen size increases.
- B. Scale the chessboard proportionally to the screen size.
- C. Increase the width of the chessboard border.
- D. Add empty space around the outside of the canvas without resizing the content.

---

**Answer: B**

---

---

**Question: 22**

---

You develop an application that cannot function in the snapped view. What should you do when a user attempts to snap the application?

- A. Temporarily snap the application and then revert it to full screen.
- B. Display a message or placeholder content in the snapped view.
- C. Do not snap the application, and display a message dialog.
- D. Display the full screen layout in the snapped view.

---

**Answer: B**

---

---

**Question: 23**

---

What is the default touch method for selecting text in a text editing control?

- A. Double-tap at the beginning of the text and then drag without lifting from the second tap.
- B. Use a reverse-pinch gesture to magnify the text, then swipe across the text to select it.
- C. Draw a circle around the text.
- D. Tap the text to reveal selection handles, then drag the handles to select the text.

---

**Answer: D**

---

---

**Question: 24**

---

In the image, what is the commanding surface?

- A. message dialog
- B. app bar
- C. context menu
- D. flyout menu

---

**Answer: A**

---

---

**Question: 25**

---

What is the purpose of proximity snap points while panning?

- A. To indicate the beginning of a new content section.
- B. To allow users to quickly scroll to the beginning or end of a page.
- C. To stop panning at each content item.
- D. To indicate that content can be scrolled.

---

**Answer: A**

---

---

**Question: 26**

---

What is the recommended font size for tertiary or subsidiary text?

- A. 9 points
- B. 11 points
- C. 20 points
- D. 42 points

---

**Answer: A**

---

---

**Question: 27**

---

When branding an application, what should you do?

- A. Leverage color, graphics, images, logo and type.
- B. Use only built-in Windows fonts.
- C. Use the logo only on application tiles and the splash screen.
- D. Always use rectangular outlines for content.

---

**Answer: A**

---

---

**Question: 28**

---

Where should you position app bar buttons that relate to the currently selected item?

- A. In alignment with the item.
- B. In the middle of the app bar.
- C. On the left side of the app bar.
- D. On the right side of the app bar.

---

**Answer: C**

---

---

**Question: 29**

---

Where on the app bar should you position global commands (commands that should appear throughout the application)?

- A. On the right side of the app bar.
- B. In the middle of the app bar.
- C. Anywhere on the app bar.
- D. On the left side of the app bar.

---

**Answer: A**

---

---

**Question: 30**

---

Which statement about the app bar is true?

- A. The app bar appears on the top edge of the screen when a user selects one or more objects,
- B. The app bar appears on demand on the left edge of the screen.

- C. The app bar is transient and can be dismissed by tapping elsewhere on the canvas.
- D. The app bar is always visible by default.

---

**Answer: C**

---

---

**Question: 31**

---

You are designing a Windows 8 application for an English language newspaper. You need to use native fonts for the application. Which font should you use for the copy of a full-length news article?

- A. Segoe UI
- B. Times New Roman
- C. Comic Sans
- D. Cambria

---

**Answer: D**

---

---

**Question: 32**

---

What is the equivalent of one grid unit in the Windows 8 design language?

- A. 5x5 pixels
- B. 10x10 pixels
- C. 20x20 pixels
- D. 100x100 pixels

---

**Answer: C**

---

---

**Question: 33**

---

What is the recommended font size for page headers?

- A. 11 points
- B. 20 points
- C. 42 points
- D. 72 points

---

**Answer: C**

---

---

**Question: 34**

---

Which application element is "chrome"?

- A. article text
- B. group boxes
- C. photos
- D. section headings

---

**Answer: B**

---

---

**Question: 35**

---

What is the most important reason to design for accessibility?

- A. Accessibility is a growing trend in application design.
- B. All people should be able to access the application.
- C. It will increase the rating of the application.
- D. It is required by the Windows Store.

---

**Answer: D**

---

---

**Question: 36**

---

Which of the following statements about Narrator is true?

- A. windows does not support touch gestures when running Narrator.
- B. Windows supports fewer touch gestures when running Narrator.
- C. Windows supports more touch gestures when running Narrator.
- D. Windows supports the same set of touch gestures regardless of whether Narrator is running.

---

**Answer: C**

---

---

**Question: 37**

---

Which of the following is the most important practice for globalizing an application?

- A. Avoid the use of text in the application interface.
- B. Design the application interface to adapt to different text sizes, orientations, and layouts.
- C. Include solutions in the application for visually impaired users and users who are deaf or hard of hearing.
- D. Design the application interface to accept different gestures for different cultures.

---

**Answer: B**

---

---

**Question: 38**

---

You are designing a localized application. How much space should you allow for the localization of English-language text strings?

- A. 20%
- B. 30%
- C. 40%
- D. 50%

---

**Answer: C**

---

---

**Question: 39**

---

What is the minimum foreground: background contrast ratio required between normal text and its background?

- A. 3:1
- B. 4.5:1
- C. 7:1
- D. 21:1

---

**Answer: B**

---

---

**Question: 40**

---

What is the primary purpose of an application hub page?

- A. To provide specific details about content.
- B. To provide direct access to all pages of the application.
- C. To invite users to explore content and user flows.
- D. To display search results.

---

**Answer: C**

---

---

**Question: 41**

---

What is the primary purpose for using the nav bar (top app bar)?

- A. To search within the application.
- B. To navigate within the application.
- C. To drill down to deeper content.
- D. To switch to other open applications.

---

**Answer: B**

---

---

**Question: 42**

---

You are designing an application hub page with sections that could include a lot of content. It is not practical to display all available content in every section. What is the preferred strategy for managing the content on the hub page?

- A. Display only a subset of the content, and use a flyout menu activated by a down arrow next to the page header to access additional content.
- B. Display only the section headers.
- C. Display only a subset of the content, and use a right-pointing arrow (>) next to section titles, or a View All button, to access additional content.
- D. Display content on a vertically scrolling panel within each section.

---

**Answer: C**

---

---

**Question: 43**

---

Which statement about navigation is FALSE?

- A. a flat navigation pattern is good for games, browsers, and document-creation applications.
- B. Semantic zoom helps to navigate between sections in a hierarchical navigation pattern.
- C. a hierarchical navigation pattern is good for a large collection of related content.
- D. The Back button provides a way to switch between documents in a flat navigation pattern.

---

**Answer: D**

---

---

**Question: 44**

---

Which of the following features is most valuable to allow users to confidently explore a Windows 8 application?

- A. horizontally panning content
- B. persistent Back button
- C. semantic zoom
- D. hub page

---

**Answer: B**

---

---

**Question: 45**

---

What is the primary purpose of the "Great At" statement?

- A. To select the best navigation pattern for the application.
- B. To focus the application design on user flows and features that add value.
- C. To differentiate between functions supported by the app bar and functions supported by the charms bar.
- D. To create a compelling application description for the Windows Store.

---

**Answer: B**

---

---

**Question: 46**

---

What is a user flow?

- A. The route a user takes through an application.
- B. Analytical data of page hits and link traversal.
- C. The number of users that download an application each day.
- D. An activity a user completes in an application in order to achieve a goal.

---

**Answer: D**

---

---

**Question: 47**

---

What should you do after brainstorming possible features for an application?

- A. Add other user flows that the features could also support.
- B. Remove user flows that are not supported by the features.
- C. Remove features that do not support a user flow.
- D. Add other useful features that are automatically provided by Windows.

---

**Answer: C**

---

---

**Question: 48**

---

Which of the following is NOT a Microsoft Design Principle for Windows 8 applications?

- A. do more with less
- B. fast and fluid
- C. visual minimalism
- D. authentically digital

---

**Answer: C**

---

---

**Question: 49**

---

Which image represents a well-designed live tile?

A. Tile

B. Tile

C. Tile

D. Tile

---

**Answer: B**

---

---

**Question: 50**

---

Which statement about an application's default tile is true?

- A. The default tile must be square.
- B. The default tile must be rectangular,
- C. The default tile may be either square or rectangular.
- D. The default tile may be any geometric shape.

---

**Answer: C**

---

---

**Question: 51**

---

Which statement about app tile badges is true?

- A. Badges can be customized by designers for any application,
- B. Badges can be customized if the application gets special permission from the Windows Store.
- C. Badges cannot be customized.
- D. Badges must be unique to the application.

---

**Answer: C**

---

---

**Question: 52**

---

Which statement about toast notifications is true?

- A. Toast notifications are required for all Windows 8 applications.
- B. Toast notifications display advertisements related to the application.
- C. Toast notifications should be used for applications with a high volume of updates.
- D. Toast notifications alert users to relevant and time-sensitive information.

---

**Answer: D**

---

---

**Question: 53**

---

What is a recommended best practice for application splash screens?

- A. Include information about the application, including the version number.
- B. Provide transparent PNG images at all three scaling levels.
- C. Display an advertisement to promote the application.
- D. Update the splash screen frequently.

---

**Answer: B**

---

---

**Question: 54**

---

Which notification delivery mechanism allows an application to deliver notifications when it is NOT running?

- A. local
- B. periodic
- C. scheduled
- D. push

---

**Answer: D**

---

---

**Question: 55**

---

Which statement about secondary tiles is true?

- A. a secondary tile should link directly to corresponding content anywhere in the application.
- B. A secondary tile should never include branding elements.
- C. a secondary tile should never be a live tile.
- D. a secondary tile should always link to a matching content tile in the hub page.

---

**Answer: A**

---

---

**Question: 56**

---

When designing a settings pane, what should you do?

- A. Include a confirmation button so that users must approve setting changes.
- B. Display settings content on a white background.
- C. Choose a custom flyout size that is appropriate for the content.
- D. Allow settings to navigate through the application where necessary.

---

**Answer: B**

---

---

**Question: 57**

---

In how many columns should you present settings content?

- A. one column
- B. two columns
- C. three columns
- D. as many columns as necessary

---

**Answer: A**

---

---

**Question: 58**

---

Which two entry points are automatically included in the Settings pane? (Each correct answer presents a complete solution. Choose two.)

- A. Rate and Review
- B. About
- C. Permissions
- D. Terms of Use

---

**Answer: BC**

---

---

**Question: 59**

---

Which two requirements should a file picker view design meet? (Each correct answer presents a complete solution. Choose two.)

- A. Be consistent with the list/browsing pages of the application.
- B. Provide only the minimum functionality required to support file picking.
- C. Be different from the list/browsing pages of the application.
- D. Provide access to all file-related commands available in the application.

---

**Answer: BD**

---

---

**Question: 60**

---

What is the recommended location from which to access help for an application?

- A. Help charm
- B. Settings charm
- C. nav bar (top app bar)
- D. app bar

---

**Answer: D**

---

---

**Question: 61**

---

What are the standard widths for a share pane?

- A. 300 pixels and 600 pixels
- B. 346 pixels and 646 pixels
- C. 350 pixels and 700 pixels
- D. 500 pixels and 1000 pixels

---

**Answer: B**

---

---

**Question: 62**

---

What is the maximum number of query suggestions that can appear in the search pane?

- A. three
- B. five
- C. determined by the screen size
- D. unlimited

---

**Answer: B**

---

---

**Question: 63**

---

When branding an application tile, what should you do?

- A. Always include branding in template images and text.

- B. Do not use branding as one of the items in the notification queue.
- C. Display the logo in the lower-right corner of the tile.
- D. Always include the application name both in text and in the logo.

---

**Answer: B**

---

---

**Question: 64**

---

Which statement about using time stamps or dates on a live tile is true?

- A. Display absolute time stamps, such as "2:14PM, Tuesday".
- B. Display only day information, such as "Tuesday".
- C. Display time stamps only on Peek tiles.
- D. Display relative time stamps, such as "1 hour ago".

---

**Answer: A**

---

---

**Question: 65**

---

Which statement about app tile content is true?

- A. App tile content must be animated.
- B. App tile content must be dynamic.
- C. App tile content must be static.
- D. App tile content may be either dynamic or static.

---

**Answer: D**

---

---

**Question: 66**

---

Which statement is true about live content that appears on an app tile?

- A. The content must also appear on the splash screen.
- B. The content must be reproduced in the application in the exact same format.
- C. The content must feature prominently on the hub page.
- D. The content must be accessible from the nav bar (top app bar).

---

**Answer: C**

---

---

**Question: 67**

---

What is the maximum number of notifications in a tile notification queue?

- A. 3
- B. 4
- C. 5
- D. 10

---

**Answer: C**

---

---

**Question: 68**

---

Which of the following built-in user interface controls is most suited for adaptive layout?

- A. Flyout
- B. PanelView
- C. Viewbox
- D. ListView

---

**Answer: B**

---

---

**Question: 69**

---

Which requirement must an application meet for submission to the Windows Store?

- A. support Portrait view
- B. be accessible to visually impaired users
- C. support sharing
- D. support snapped view

---

**Answer: D**

---

---

**Question: 70**

---

You are designing a language learning application. All users can download the application and learn basic greetings and counting for free. To learn about grammar and other topics, users must pay a one-time fee. Which method of monetization does the application use?

- A. third-party transaction
- B. in-application purchase
- C. feature-limited trial
- D. time-limited trial

---

**Answer: C**

---

---

**Question: 71**

---

Which of the following is a recommended best practice for integrating advertisements into an application?

- A. Place ads outside of the standard grid to distinguish them from content.
- B. Display advertising on the application tiles.
- C. Display advertising on the splash screen.
- D. Ensure that ads conform to the standard grid and align with other application content.

---

**Answer: D**

---

---

**Question: 72**

---

Which user group must an application be rated for to use the Microsoft Advertising SDK?

- A. 12 years and older
- B. 14 years and older
- C. 16 years and older
- D. 18 years and older

---

**Answer: A**

---

---

**Question: 73**

---

Assuming that users read from left to right, how is content displayed on a page that uses the Enter Page animation?

- A. The page content is present on the page when the page appears.
- B. The page content appears in a staggered sequence from top to bottom and from right to left.
- C. The page content appears in a staggered sequence from top to bottom and from left to right.
- D. The page content fades in all at once a short time after the page appears.

---

**Answer: C**

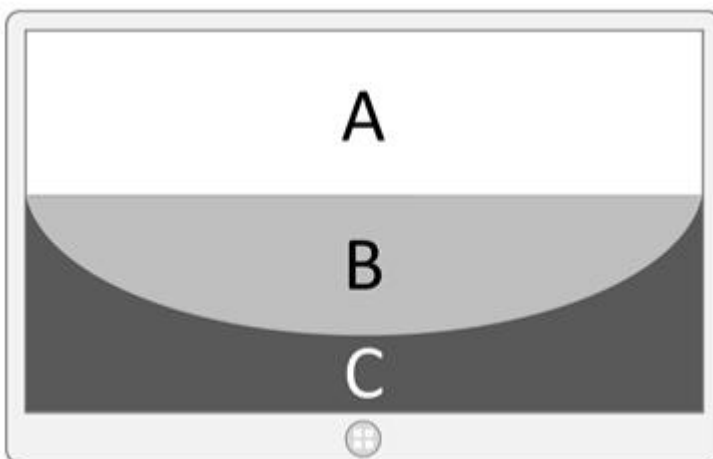

---

---

**Question: 74**

---

You are designing a Windows 8 application for a newspaper. In which part of the application interface should you position interactive elements?

- A. Area A only
- B. Area B only
- C. Areas A and B
- D. Area C only

---

**Answer: D**

---

---

**Question: 75**

---

If tapping an item navigates to that item, which gesture would you use by default to allow users to select the item?

- A. circle
- B. double-tap
- C. press and hold
- D. cross-swipe

---

**Answer: D**

---

---

### Question: 76

---

In the Windows 8 touch language, what action should always occur when a user taps an element?

- A. Display a context menu.
- B. Invoke the primary action of the element.
- C. Select the element.
- D. Navigate to the element details.

---

**Answer: B**

---

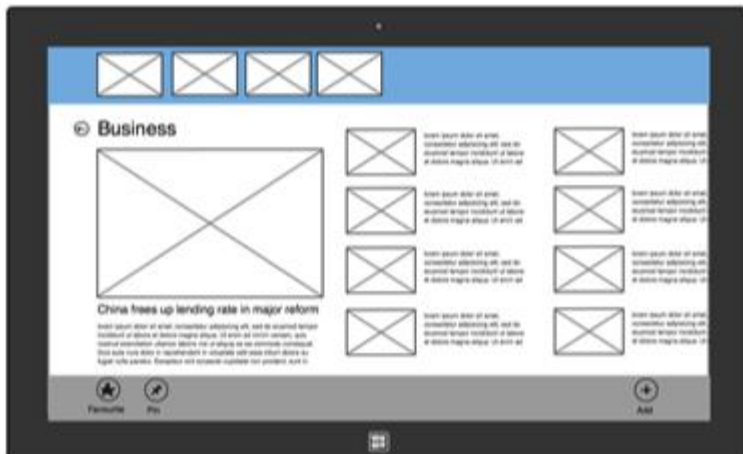

---

### Question: 77

---

What is the name of the area at the top of the application window that is depicted in blue in the following image?

- A. charms bar
- B. header
- C. nav bar (top app bar)
- D. app bar

---

**Answer: C**

---

---

### Question: 78

---

Which Windows 8 navigation pattern is considered to be a recommended standard?

- A. links

- B. flat
- C. node tree
- D. tabs

---

**Answer: B**

---

---

**Question: 79**

---

What is the order of pages in a typical hierarchical navigation pattern?

- A. details page (Level 1), hub page (Level 2), section page (Level 3)
- B. section page (Level 1), hub page (Level 2), details page (Level 3)
- C. section page (Level 1), details page (Level 2), hub page (Level 3)
- D. hub page (Level 1), section page (Level 2), details page (Level 3)

---

**Answer: D**

---

---

**Question: 80**

---

You are designing an application for shopping list management. When users attempt to delete a list, you need to warn them and have them explicitly confirm the deletion. Which command surface should you use?

- A. flyout menu
- B. charms bar
- C. message dialog
- D. notification

---

**Answer: C**

---

---

**Question: 81**

---

What is the recommended font size for body copy or body text?

- A. 8 points
- B. 9 points
- C. 11 points
- D. 20 points

---

**Answer: C**

---

---

**Question: 82**

---

What is the recommended font size for sub-headers?

- A. 9 points
- B. 11 points
- C. 20 points
- D. 42 points

---

**Answer: C**

---

---

**Question: 83**

---

What should you do with disabled app bar buttons?

- A. Display the buttons as unavailable.
- B. Move the buttons to the middle of the app bar.
- C. Hide the buttons.
- D. Display a message box stating that the button functions are not available.

---

**Answer: C**

---

---

**Question: 84**

---

---

**Answer: A**

---

---

**Question: 87**

---

Which gesture reveals the app bar?

- A. press and hold
- B. swipe from the top or bottom edge of the screen
- C. swipe from the left edge of the screen
- D. pinch

---

**Answer: B**

---

---

**Question: 88**

---

Which of the following statements about controls such as buttons and check boxes follows Windows 8 design principles?

- A. Controls should appear only on flyout menus and in charm panes.
- B. Controls should appear on the page canvas only in standard locations.
- C. Only controls that support the core purpose of a page should appear on the page canvas.
- D. Controls should never appear on the page canvas.

---

**Answer: C**

---

---

**Question: 89**

---

You are designing a globalized fitness application. You need to allow users to select their preferred units of measure for weight. What should you do?

- A. Allow users to change their unit of measure in the Settings charm.
- B. Allow users to change their unit of measure on the application page.
- C. Provide different versions of the application that use different units of measure for different markets.
- D. Allow users to change their unit of measure in Control Panel settings.

---

**Answer: D**

---

---

**Question: 90**

---

You are designing an application in English. When translated into other languages, some of the text strings will be much longer than in English. What is the best practice to follow?

- A. Shorten the translated phrases to maintain the original layout.
- B. Dynamically adjust the size and layout of text areas for different languages.
- C. Allocate enough space to accommodate the longest translation of each phrase.
- D. Reduce the font size for translated phrases to maintain the original layout.

---

**Answer: B**

---

---

**Question: 91**

---

You need to make an application global. What steps should you perform and in which order?

- A. Globalization and then localization.
- B. Localization and then globalization.
- C. Globalization, regionalization, and then localization.
- D. Localization, regionalization, and then globalization.

---

**Answer: A**

---

---

**Question: 92**

---

What is the default high contrast theme on a Windows 8 device?

- A. red on black
- B. white on black
- C. black on white
- D. black on red

---

**Answer: B**

---

---

**Question: 93**

---

You need to ensure that users can cycle through all interactive elements of an application by pressing a key. Which key should you designate?

- A. Return
- B. Tab
- C. Windows key
- D. Spacebar

---

**Answer: B**

---

---

**Question: 94**

---

Which of the following statements about user flows and features is true?

- A. a user flow is a specification for implementing a feature.
- B. a feature is a goal that users can achieve by using the application.
- C. a feature can be used toward achieving a user flow.
- D. a user flow is a step toward achieving a goal.

---

**Answer: C**

---

---

**Question: 95**

---

You are designing a Windows 8 application. You need to identify user flows and features and create a Great At statement. In what order should you complete the design activities?

- A. identify user flows, identify features, create a Great At statement
- B. identify user flows, create a Great At statement, identify features
- C. create a Great At statement, identify user flows, identify features

D. create a Great At statement, identify features, identify user flows

---

**Answer: C**

---

---

**Question: 96**

---

Which of the following actions does the Windows button or Windows key perform in Windows 8?

- A. switches between the Windows Start screen and the current application
- B. opens and closes the charms bar
- C. starts Windows Internet Explorer
- D. opens and closes the app bars

---

**Answer: A**

---

---

**Question: 97**

---

You have an image file named image.jpg. You need to provide scaled image files to leverage Windows 8 resource loading. Which filenames should you use for the scaled image files?

- A. image-100.jpg, image-140.jpg, and image-180.jpg
- B. image-scale-l.jpg, image-scale-2.jpg, and image-scale-3.jpg
- C. image.scale-100.jpg, image.scale-140.jpg, and image.scale-180.jpg
- D. image-scale-l.jpg, image-scale-L4.jpg, and image-scale-L8.jpg

---

**Answer: D**

---

---

**Question: 98**

---

Which of the following statements about pixel density is true?

- A. Higher-density and lower-density screens may be the same size.
- B. A higher-density screen is always larger than a lower-density screen.
- C. a higher-density screen is always smaller than a lower-density screen.
- D. Elements appear larger on a higher-density screen than on a lower-density screen.

---

**Answer: A**

---

---

**Question: 99**

---

What is the screen width of a Windows 8 snapped view?

- A. 256 pixels
- B. 320 pixels
- C. 360 pixels
- D. 400 pixels

---

**Answer: B**

---

---

**Question: 100**

---

You are designing a Windows 8 application for a newspaper. On the page that allows users to read a complete article, which layout method should you use to adapt the content to different screen sizes?

- A. Fixed layout: Scale the entire layout up to fit any screen size by using the Viewbox control.
- B. None: Always allow Windows 8 to automatically rescale the application.
- C. Distinct layout: Provide a specific layout for each possible screen size and orientation.
- D. Adaptive layout: Allow areas of the page to grow to accommodate additional space.

---

**Answer: D**

---

---

**Question: 101**

---

When implementing snapped view, what should you do?

- A. Maintain consistent font sizes with the filled view.
- B. Maintain context when entering and exiting snapped view.
- C. Scroll in the same direction as the filled view.
- D. Use the same layout as the filled view.

---

**Answer: B**

---
