Microsoft

MB6-872 PRACTICE EXAM

Microsoft Dynamics AX 2012 Installation and Configuration

Question: 1

Which components are required in a minimum server setup for Microsoft Dynamics AX 2012?

A. Application Object Server (AOS) and Database Server
B. Application Object Server (AOS) and Report Server
C. Database Server and Analysis Server
D. Database Server and Web Server

Answer: A

Question: 2

In Microsoft Dynamics AX 2012, what is the default TCP/IP port number used by the Application Object Server (AOS) function?

A. 1428
B. 1433
C. 2710
D. 2712

Answer: D

Question: 3

In a multiple-server Microsoft Dynamics AX 2012 environment, which network account can be used for the Dynamics AX Object Server Windows service?

A. Domain name\domain account
B. NT AUTHORITY\Local Service account
C. Microsoft Dynamics AX 2012 user account
D. Microsoft SQL Server Database Owner account

Answer: A

Question: 4

What type of account is required to integrate other applications with Microsoft Dynamics AX 2012?

A. .NET Business Connector Proxy account
B. AOS Service account
C. Microsoft SQL Server Database Engine account
D. Workflow Execution account

Answer: A

Question: 5

In Microsoft Dynamics AX 2012, which of the following components will run only on a 64-bit operating system? (Choose all that apply.)

A. Enterprise Portal for Microsoft Dynamics AX 2012
B. Help Server
C. Synchronization Service
D. Web Services

Answer: B, A

Question: 6

Which of the following is required to run Microsoft Dynamics AX 2012 in an Active Directory environment?

A. Microsoft Dynamics AX 2012 components must be installed within the same domain.
B. Microsoft Dynamics AX 2012 components must be installed on each user's workstation.
C. Microsoft Dynamics AX 2012 components must be installed in a Cloud configuration.
D. Microsoft Dynamics AX 2012 components must be installed in a Windows Terminal Server configuration.

Answer: A

Question: 7

Which of the following web browsers meet the minimum requirements for client computers to access Enterprise Portal for Microsoft Dynamics AX 2012? (Choose all that apply.)

A. Mozilla Firefox 2
B. Mozilla Firefox 3.5
C. Windows Internet Explorer 7
D. Windows Internet Explorer 8
E. Windows Internet Explorer 9

Answer: E, D, B

Question: 8

Which Microsoft Dynamics AX 2012 tool should you use to troubleshoot performance issues?

A. Debugger
B. Development Workspace Tools
C. Management Utilities
D. Trace Parser

Answer: D

Question: 9

In Microsoft Dynamics AX 2012, to which types of internal organizations can the Centralized Payments hierarchy purpose be assigned?

A. all party entities
B. only legal entities
C. only operating units
D. only teams

Answer: B

Question: 10

In Microsoft Dynamics AX 2012, which of the following operating units is used for financial reporting and is based on industries or product lines that the organization serves independently of legal entities?

A. business unit
B. cost center
C. department
D. value stream

Answer: A

Question: 11

In Microsoft Dynamics AX 2012, which of the following hierarchy purposes can be assigned only to a legal entity organization type?

A. Audit internal control
B. Expenditure control
C. Procurement internal control
D. Security

Answer: A

Question: 12

In Microsoft Dynamics AX 2012, which of the following cannot be overridden for individual organizations in a hierarchy?

A. address books
B. parameters
C. policies
D. transactions

Answer: A

Question: 13

When installing Microsoft Dynamics AX 2012, which of the following conditions does the stand-alone prerequisite validation utility verify?

A. the database server location
B. whether a supported version of Windows is installed
C. whether an Application Object Server (AOS) is running in the environment
D. whether required Microsoft Dynamics AX 2012 components are installed and configured

Answer: B

Question: 14

In Microsoft Dynamics AX 2012, which files do model files replace during the upgrade process?

A. database data files
B. Enterprise Portal system files
C. Application Object Definition (AOD) files
D. Application Object Server (AOS) setup files

Answer: C

Question: 15

You are setting up the Active Directory group login for the Application Object Server (AOS) accounts on the database server. To which of the following Microsoft SQL Server database roles must the group login be added in Microsoft Dynamics AX 2012? (Choose all that apply.)

A. db_accessadmin
B. db_datareader
C. db_datawriter
D. db_ddladmin
E. db_owner
F. db_securityadmin

Answer: D, C, B

Question: 16

In Microsoft Dynamics AX 2012, which utility allows you to enable breakpoints and to review the Application Object Server (AOS) settings on the AOS?

A. Microsoft Dynamics AX Client utility
B. Microsoft Dynamics AX Configuration utility
C. Microsoft Dynamics AX Server Configuration utility
D. Microsoft Dynamics AX standalone prerequisite validation utility

Answer: C

Question: 17

You need to determine the Microsoft Dynamics AX 2012 database tuning and debugging settings.
What should you use?

A. the AxUtil command-line utility
B. only the Microsoft Dynamics AX Configuration utility
C. only the Microsoft Dynamics AX Server Configuration utility
D. the Microsoft Dynamics AX Configuration utility and the Microsoft Dynamics AX Server Configuration utility

Answer: D

Question: 18

In Microsoft Dynamics AX 2012, which of the following are the primary purposes of the Microsoft Office add-ins?
(Choose all that apply.)

A. Lightweight reporting and editing of data in Microsoft Excel.
B. Importing data into Microsoft Dynamics AX 2012 by using Microsoft Excel templates.
C. Importing data into Microsoft Dynamics AX 2012 by using Microsoft Word and Microsoft OneNote templates.
D. Exporting data from Microsoft Dynamics AX 2012 by using Microsoft Excel, and publishing documents to Enterprise Portal for Microsoft Dynamics AX 2012.

Answer: B, A

Question: 19

In Microsoft Dynamics AX 2012, which of the following tasks do the Microsoft Office add-ins enable a user to perform?

A. Only export data from Microsoft Dynamics AX 2012.
B. Export from and import data into Microsoft Dynamics AX 2012.
C. Automatically email customer invoices by using Microsoft Outlook.
D. Publish reports to Enterprise Portal for Microsoft Dynamics AX 2012.

Answer: B

Question: 20

You need to install Microsoft Dynamics AX 2012 on a mix of 32-bit and 64-bit client computers.
What should you do?

A. Create a single configuration file in a shared directory on any available server, and specify the configuration file for each client.
B. Create a separate configuration file for each operating system in a shared directory on the Application Object Server (AOS), and specify the appropriate configuration file for each client computer.
C. Create a separate configuration file for each operating system in the bin directory in the Microsoft Dynamics AX DVD shared folder, and specify the appropriate configuration file for each client computer.
D. Create a separate configuration file for each operating system at the same level as the Setup.exe file in the Microsoft Dynamics AX DVD shared folder, and specify the appropriate configuration file for each client computer.

Answer: C

Question: 21

Which of the following is a function of the Windows Server Group Policy feature when installing clients for Microsoft Dynamics AX 2012?

A. Setting up the Microsoft Dynamics AX application user permissions.
B. Deploying multiple Microsoft Dynamics AX Windows clients at one time.
C. Allowing the Setup wizard to run in silent mode, without passing parameter information.
D. Creating a batch file to install Microsoft Dynamics AX Windows clients with a shared configuration.

Answer: B

Question: 22

In Microsoft Dynamics AX 2012, which database objects does the Synchronize Database portion of the Initialization Checklist synchronize to the Application Object Tree (AOT)?

A. Tables and views
B. Tables and indexes
C. Indexes and views
D. Indexes and permissions

Answer: B

Question: 23

When initializing Microsoft Dynamics AX 2012, which task enables or disables the system-wide application functionality provided by the license?

A. Compile application
B. Configure application functionality
C. Generate CIL
D. Modify data types

Answer: B

Question: 24

Which of the following statements about Microsoft Dynamics AX 2012 data security policies are true? (Choose all that apply.)

A. Data security policies cannot be used to restrict access to an individual database.
B. Data security policies can be applied to security roles to control access to transactional data.
C. Data security policies can be used to control access to transactional data based on a query.
D. Data security policies can be used to control access to transactional data based on user data.
E. Data security policies can be used to control access to transactional data based on an effective date.

Answer: E, D, B

Question: 25

Which of the following statements about the Table Permissions Framework (TPF) in Microsoft Dynamics AX 2012 is true?

A. TPF can be used to grant a user access to database tables.
B. TPF can be used to deny a user access to individual fields.
C. TPF can be used to deny a user access to database records based on a query.
D. TPF can be used to deny a user access to database records based on an effective date.

Answer: B

Question: 26

Which of the following statements describes how users can view and edit data for multiple companies in Microsoft Dynamics AX 2012?

A. A user may view and edit data for a company other than the one that he or she is currently logged on to.
B. A user may not view or edit data for a company other than the one that he or she is currently logged on to.
C. A user may view data for a company other than the one that he or she is currently logged on to, but can edit data only for the current company.
D. A user may view or edit data for a table that contains a DataAreaID column only when they are logged on to the company associated with the DataAreaID value.

Answer: A

Question: 27

Which authentication type allows the use of Windows Live ID as an authentication form for users of Enterprise Portal for Microsoft Dynamics AX 2012?

A. HTTP Basic Authentication
B. HTTP Digest Authentication
C. Kerberos Authentication
D. Pluggable Authentication

Answer: D

Question: 28

Which of the following statements about Active Directory groups and Microsoft Dynamics AX 2012 is true?

A. You can apply Microsoft Dynamics AX 2012 security roles directly to AD groups.
B. When you import AD group members into Microsoft Dynamics AX 2012, you must assign a profile at the same time.
C. When you link an AD group with Microsoft Dynamics AX 2012, the AD group members are automatically granted full application permissions.
D. After you link an AD group with Microsoft Dynamics AX 2012, if a member is removed from the AD group, his or her

access to Microsoft Dynamics AX 2012 is not automatically removed.

Answer: A

Question: 29

Which form of pluggable authentication allows users to access Enterprise Portal for Microsoft Dynamics AX 2012 by authenticating against a custom database?

A. Active Directory Federation Services
B. Custom Security Token Services
C. Forms-based Authentication
D. Windows Live ID

Answer: C

Question: 30

Which of the following are valid Microsoft Dynamics AX 2012 role types? (Choose all that apply.)

A. Application Role
B. Functional Role
C. Operational Role
D. Organizational Role
E. Process Role

Answer: D, B, A

Question: 31

Which of the following statements about role-based security in Microsoft Dynamics AX 2012 is true?

A. A duty can be assigned to only one security role.
B. A privilege can be assigned to only one security role.
C. Microsoft Dynamics AX 2012 includes default security roles.
D. A security role cannot be defined as a combination of other security roles.

Answer: C

Question: 32

Which of the following statements about the extensible data security framework in Microsoft Dynamics AX 2012 is true?

A. The extensible data security framework cannot be used in conjunction with role-based security in Microsoft Dynamics AX 2012.
B. The extensible data security framework can be used to filter data for fields that are contained in separate tables from the data that is being filtered.
C. The extensible data security framework can be used to create data security policies that provide different levels of

access to a user based on a query.
D. The extensible data security framework can be used to create data security policies that are enforced based on the type of client that is used to access the data.

Answer: B

Question: 33

Which of the following statements about record-level security in Microsoft Dynamics AX 2012 is true?

A. Record-level security cannot be used to limit access to data based on a query.
B. Record-level security enables administrators to restrict the data that displays on forms.
C. Record-level security enables administrators to restrict the data that displays on menus.
D. Record-level security does not enable administrators to restrict the data that displays in reports.

Answer: B

Question: 34

Which of the following statements about overrides for securable objects in Microsoft Dynamics AX 2012 is true?

A. Overrides cannot be applied to individual fields in the database.
B. Overrides for securable objects are associated with specific duties or privileges.
C. When you apply an override, the access level for the object is set for the role only if that access level is specified by the duties and privileges assigned to that role.
D. When you apply an override, the access level for the object is set for the role regardless of the access levels specified by the duties and privileges assigned to that role.

Answer: D

Question: 35

Which of the following statements about the security model in Microsoft Dynamics AX 2012 is true?

A. Duties can be applied directly to security roles.
B. Duties are combined into privileges.
C. Privileges are grouped into process cycles.
D. Privileges cannot be applied directly to security roles.

Answer: A

Question: 36

Which of the following statements about basic integration ports used by Microsoft Dynamics AX 2012 is true?

A. Basic integration ports can host services either on the Application Object Server (AOS) or on IIS.
B. Basic integration ports allow the user the ability to specify advanced security and troubleshooting settings.
C. Basic integration ports support a variety of protocols through Windows Communication Foundation (WCF) adapters.

D. Basic integration ports are exposed at a specific Windows Communication Foundation (WCF) endpoint on the Application Object Server (AOS) host.

Answer: D

Question: 37

Which of the following system services are supported by the Application Integration Framework in Microsoft Dynamics AX 2012? (Choose all that apply.)

A. Customer service
B. IIS Admin service
C. Metadata service
D. Query service
E. User Session service

Answer: E, D, C

Question: 38

Which of the following statements about system services in Microsoft Dynamics AX 2012 is true?

A. Services are hosted on IIS by default.
B. Microsoft Dynamics AX 2012 Web Services is a required component.
C. To consume the system services over the Internet, the services must be hosted on IIS.
D. Services hosted by the Application Object Server (AOS) are available by default to all users and applications across the Internet.

Answer: C

Question: 39

Which of the following statements about Microsoft Dynamics AX 2012 are true? (Choose all that apply.)

A. To deploy system services over the Intranet, the services must be installed on IIS.
B. All the services references are placed in a single Web Services Description Language (WSDL) file.
C. The services framework uses connection pooling to reduce the overhead of creating and destroying a session on service calls.
D. To achieve scale and redundancy, configure network load balancing for the services across the Application Object Server (AOS) servers.
E. Client applications can access services by using the Windows Communication Foundation (WCF) runtime, but must use the .NET Business Connector.

Answer: D, C, B

Question: 40

Which of the following is a valid workflow type in Microsoft Dynamics AX 2012?

A. Accounting Workflow
B. Currency Manager Workflow
C. Order Management Workflow
D. Organization Workflow

Answer: D

Question: 41

When adding a manual decision to a workflow, which option should you select if you want to assign the decision to specific users?

A. Participant
B. Queue
C. User
D. Workflow User

Answer: A

Question: 42

Which of the following statements about workflows in Microsoft Dynamics AX 2012 is true?

A. Line-level workflows are available for each workflow type.
B. A workflow can be specified for individual line items on a document.
C. A single workflow cannot be invoked for all line items on a document.
D. Workflow processes run at the header level rather than at the line level.

Answer: B

Question: 43

In Microsoft Dynamics AX 2012, which of the following statements about the default workflow performance analysis reports are true? (Choose all that apply.)

A. Workflow performance analysis reports can provide overall performance numbers for workflow instances.
B. Workflow performance analysis reports can provide the amount of time required for the workflow code to execute.
C. Workflow performance analysis reports can provide performance numbers for all workflows, broken down by user.
D. Workflow performance analysis reports can provide performance numbers for a specific workflow, broken down by workflow element.

Answer: D, A

Question: 44

Which of the following statements about viewing workflow history in Microsoft Dynamics AX 2012 is true?

A. Workflow history for some workflow types cannot be viewed in the Microsoft Dynamics AX 2012 client.
B. Workflow history for completed workflows cannot be viewed in Enterprise Portal for Microsoft Dynamics AX 2012.

C. Workflow history for a User Workflow type workflow cannot be viewed in Enterprise Portal for Microsoft Dynamics AX 2012.

D. Data for advanced flow controls and line item approvals can be viewed in the workflow history in the Microsoft Dynamics AX 2012 client.

Answer: D

Question: 45

In Microsoft Dynamics AX 2012, on which calendar is the date dimension of the default cubes based?

A. 360 day
B. fiscal year
C. Gregorian
D. ISO week date

Answer: C

Question: 46

In Microsoft Dynamics AX 2012, which default cube provides data that assists in tracking the history and current status of business processes?

A. Customer Relationship Management
B. Expense Management
C. Production
D. Workflow

Answer: D

Question: 47

Which of the following actions can you perform by using the Microsoft SQL Server Analysis Services project wizard? (Choose all that apply.)

A. Update a deployed default cube.
B. Update Key Performance Indicators (KPIs).
C. Create Key Performance Indicators (KPIs) for any cube.
D. Create Key Performance Indicators (KPIs) for only the default cubes.

Answer: B, A

Question: 48

Which of the following actions does the Microsoft Dynamics AX 2012 Setup Wizard perform? (Choose all that apply.)

A. Deploy the default cubes.
B. Install the Microsoft SQL Server Reporting Services extensions.
C. Create the Microsoft SQL Server Analysis Services configuration.

D. Remove legacy Microsoft SQL Server Reporting Services reports.

E. Verify that the prerequisite software has been installed on the Online Analytical Processing (OLAP) server.

Answer: E, C, B

Question: 49

Which of the following procedures must be completed to integrate Microsoft Dynamics AX 2012 with Microsoft SQL Server Analysis Services? (Choose all that apply)

A. Automate the processing of the cubes.

B. Grant users access to the default cubes.

C. Run the Microsoft Dynamics Cube Deployment Utility.

D. Perform the final configuration of the cubes by using the Configuration form.

E. Connect SQL Server Analysis Services to the Application Object Server (AOS) by using the Business Intelligence Analysis Servers form.

Answer: E, B, A

Question: 50

What happens when the configuration keys related to database columns are turned off in Microsoft Dynamics AX 2012?

A. The database columns are deleted.

B. The database columns are deactivated.

C. The database columns and related data remain in the database.

D. The database columns remain in the database, but the related data is deleted.

Answer: D

Question: 51

When integrating the Microsoft SQL Server Reporting Services reports in Microsoft Dynamics AX 2012 with the Microsoft Dynamics AX 2012 batch framework, which of the following actions can be performed? (Choose all that apply.)

A. Schedule a report to be printed on a recurring basis.

B. Schedule a report to be printed during off-peak hours.

C. Automate the report batch tasks that run on the Microsoft Dynamics AX 2012 client by using the Set up batch processing form.

D. Automate the report batch tasks that run on the Microsoft Dynamics AX 2012 batch server by using the Set up batch processing form.

Answer: B, A

Question: 52

Which tasks must be completed before deploying the Microsoft SQL Server Reporting Services (SSRS) reports by using

Windows PowerShell in Microsoft Dynamics AX 2012? (Choose all that apply.)

A. Install Windows PowerShell 2.0 on the computer that is being used to deploy the reports.
B. Install the Analysis extensions on the server that is running Microsoft Dynamics AX 2012.
C. Install the Reporting extensions on the server that is running Microsoft Dynamics AX 2012.
D. Assign the user who is deploying the reports to the System Administrator role on the Report Manager website.
E. Assign the Windows domain account of the user who is deploying the reports to the Administrators group on the server that is running SSRS.

Answer: E, D, A

Question: 53

In Microsoft Dynamics AX 2012, the default report server configuration is created by the installation of which components?

A. server components
B. integration components
C. business intelligence components
D. Microsoft SQL Server Reporting Services components

Answer: C

Question: 54

In Microsoft Dynamics AX 2012, which of the following are verified by validating the settings on the Report Server form?

A. The Reporting Server URLs are correct.
B. The Report Manager website is configured.
C. The Help service for Reporting Manager is installed.
D. The Application Object Server (AOS) instance can communicate with the Reporting Services instance.

Answer: D

Question: 55

Which of the following Windows Server roles must be configured before installing Enterprise Portal for Microsoft Dynamics AX 2012?

A. File Services
B. Terminal Services
C. Web Services
D. Windows Deployment Services

Answer: C

Question: 56

You plan to install Enterprise Portal for Microsoft Dynamics AX 2012 on an existing IIS site that is configured with a host header. Which registry entry must you create before installing Enterprise Portal?

A. BackConnectionHostNames
B. IISHostNames
C. ServerHostNames
D. SharepointHostNames

Answer: A

Question: 57

Which of the following Windows Server roles is a prerequisite for installing Microsoft Dynamics AX 2012 Enterprise Search?

A. File Services
B. Hyper-V
C. Remote Desktop Services
D. Web Server

Answer: D

Question: 58

Which of the following actions can you perform for Enterprise Portal for Microsoft Dynamics AX 2012 by using the AXUpdatePortal utility?

A. Compile the Enterprise Portal X++ classes.
B. Update the X++ reports in Enterprise Portal.
C. Change the parameters on an Enterprise Portal page without disrupting user connectivity to the page.
D. Deploy changes from the Application Object Tree (AOT) on a 32-bit client to Enterprise Portal on a 64-bit server that is running Windows Server.

Answer: D

Question: 59

When deploying changes to Enterprise Portal for Microsoft Dynamics AX 2012, which option should you choose to deploy new page definitions?

A. Server
B. Web application
C. Web controls
D. Website

Answer: D

Question: 60

What happens when you deploy changes to a web application in Enterprise Portal for Microsoft Dynamics AX 2012?

A. New site definitions are deployed.
B. The existing site definitions are updated.
C. The development workspace is deployed.
D. The images, proxy files, static files and web controls are updated.

Answer: D

Question: 61

Which of the following is a valid parameter for Enterprise Portal for Microsoft Dynamics AX 2012?

A. The search service URL that is in Enterprise Portal.
B. The types of documents that users can open from Enterprise Portal.
C. The sizes of images that are displayed on the Enterprise Portal pages.
D. The number of columns that are displayed on the Enterprise Portal pages.

Answer: B

Question: 62

From which source location can you publish images to the Enterprise Portal for Microsoft Dynamics AX 2012 images directory?

A. the Resources node of the Application Object Tree (AOT)
B. any directory on the server that is running Microsoft Dynamics AX 2012
C. the Images table in the Microsoft Dynamics AX 2012 baseline model store database
D. the images directory in Microsoft SharePoint Server or Microsoft SharePoint Foundation

Answer: A

Question: 63

You are configuring Enterprise Search for Microsoft Dynamics AX 2012. You need to ensure that the default queries work correctly. What should you do?

A. Update the search service URL.
B. Set the Search Crawler role to read-only.
C. In the Queries node of the Application Object Tree (AOT), set the searchable property to True.
D. In the Microsoft SharePoint Business Data Connectivity (BDC) service, set the searchable property to True.

Answer: C

Question: 64

Which wizard enables administrators to select the queries that are published and the fields that are available in search results in Enterprise Portal for Microsoft Dynamics AX 2012?

A. Microsoft Business Solutions Perimeter Network Configuration wizard
B. Microsoft Dynamics AX AIF Document Service wizard
C. Microsoft Dynamics AX Search Configuration wizard
D. Microsoft SharePoint Products Configuration wizard

Answer: C

Question: 65

Where and in what form are Microsoft Dynamics AX 2012 model files stored and shared?

A. in a separate database as .aod and .ald files
B. in the Microsoft Dynamics AX 2012 Microsoft SQL Server database, as .axmodel files
C. in a separate Microsoft SQL Server database as a model store, with the .axmodel files imported from the application file share
D. in the Microsoft Dynamics AX Microsoft SQL Server database as a model store, with the .axmodel files in a shared network folder location

Answer: B

Question: 66

In Microsoft Dynamics AX 2012, when is the model store accessed and used? (Choose all that apply.)

A. at runtime
B. when importing data
C. in a development environment
D. during backup and recovery processes
E. during installation and upgrade processes

Answer: E, C, A

Question: 67

How can you create label files for Microsoft Dynamics AX 2012?

A. Use the Windows PowerShell Get-Help cmdlet.
B. Run the Microsoft SQL Server Installation Wizard.
C. Use the AxUtilLib DLL in any development workspace.
D. Use the Create Label Wizard in a new development workspace.

Answer: D

Question: 68

You need to monitor Microsoft Dynamics AX 2012 for optimal performance by using performance counters. What should you use?

A. Application Integration Framework (AIF)

B. Microsoft Baseline Configuration Analyzer
C. Microsoft System Center Operations Manager Management Pack
D. System Administration module

Answer: C

Question: 69

Which of the following tools can an administrator use to perform real-time monitoring of Microsoft Dynamics AX 2012? (Choose all that apply.)

A. Performance Monitor
B. Microsoft Baseline Configuration Analyzer
C. Microsoft SQL Server Management Studio
D. Microsoft System Center Operations Manager management pack

Answer: D, A

Question: 70

You might need to use the scroll bar to view the entire contents of the question. In Microsoft Dynamics AX 2012, you need to set the email parameters in the Email parameters form for an SMTP server that uses Windows authentication. What should you do?

A. Set the SMTP port to 25.
B. Select the Use NTLM check box.
C. Specify the IP address of the SMTP server.
D. Specify the machine name of the SMTP server.

Answer: B

Question: 71

Note the following consideration when answering this type of question:
In Microsoft Dynamics AX 2012, what are the destination options for email broadcasts?

A. Broadcasts can be sent only to all online Microsoft Dynamics AX 2012 users.
B. Broadcasts can be sent to all online Microsoft Dynamics AX 2012 users or to all offline Microsoft Dynamics AX 2012 users.
C. Broadcasts can be sent to a single internal email user or to all internal email users.
D. Broadcasts can be sent to internal email distribution groups set up by using a Microsoft Dynamics AX 2012 template.

Answer: B

Question: 72

Need. Then click Close Simulation and answer the question. You need to set up a dedicated Application Object Server (AOS) to support batch processing in Microsoft Dynamics AX 2012. What should you do? (Choose all that apply.)

A. Install the AOS batch server on a standalone server.
B. Install the AOS batch server on the same cluster as the active AOS servers.
C. Install the AOS batch server on a separate cluster from the active AOS servers.
D. Ensure that Microsoft Dynamics AX 2012 client computers can connect to the AOS batch server.

Answer: C, A

Question: 73

Which security credentials does Microsoft Dynamics AX 2012 use to execute a batch job?

A. the credentials of the system service account
B. the credentials of the user who creates the job
C. the credentials of the system local user account
D. the credentials of the Application Object Server (AOS) service account

Answer: B

Question: 74

From where can you create an alert rule in Microsoft Dynamics AX 2012?

A. the EventAlertInBox form
B. the Alert parameters menu
C. the Manage alert rules form
D. the System Administrator Setup module

Answer: C

Question: 75

You need to notify members of the Microsoft Dynamics AX 2012 Admin user group when production orders are released. What should you do?

A. set up a task
B. set up an alert
C. set up the email distributor batch
D. set up the Windows PowerShell cmdlets

Answer: B
